

NIGHTLINE, INC.

NIGHT VISION SPECIALISTS

W1000-9 Thermal Weapon Sight

The W1000 allows the warfighter to shoot equally well during the day and at night. The Uncooled Thermal Weapon Sight also cuts through dust, smoke, fog, haze and other battlefield obscurants.

It is not easily fooled by camouflage, and because it emits no light or RF energy, its use cannot be detected. It is effectively used as a handheld imager or a rifle-mounted sight and it features an RS-170 video format output for an external display, NTSC video recording or video transmitter.

Features

- One Year Warranty
